Part III EXAMINER'S AMENDMENT and REASONS FOR ALLOWANCE

1. An Examiner's Amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 C.F.R. § 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the Issue Fee.

Authorization for this Examiner's Amendment was given in a telephone interview with Joseph Sawyer on June 6, 1996.

- 2. The application has been amended as follows:
- a. Please delete the present title and insert therefor --METHOD AND SYSTEM FOR INTERACTIVELY TRANSMITTING MULTIMEDIA INFORMATION OVER A NETWORK WHICH REQUIRES A REDUCED BANDWIDTH--.
- b. On page 1 of the specification, in the line after the title, please insert the following paragraph,

-- CROSS REFERENCE TO RELATED APPLICATION

This application is a continuation-in-part (CIP) of application Ser. No. 07/975,824 filed November 11, 1992, now U.S. Pat. No. 5,325,423.--.

c. In claim 31, line 7, delete "location" and insert thereof -- layer --.

The following is an Examiner's Statement of Reasons for Allowance: 3.

- As per independent claim 40, the limitations of "optimizing the program a. material by separating the information into primary and secondary layers (line 7)" and "the program materials further optimized by enhancing information in the primary layers to provide a perceived improvement in the quality of information when presented to a user, and by compressing at least a portion of the optimized program materials to reduce the bandwidth (lines 10-15)" are not anticipated by the prior art of record and would not have been obvious to a person of ordinary skill in the art at the time the invention was made in view of the prior art of record.
- As per independent claim 41, the limitations of "means for enhancing the b. layers ...through selective use of an objective quality standard that includes metrics of the quality of the layers, and a subjective quality standard that is controlled by user feedback (lines 7-13)" are not anticipated by the prior art of record and would not have been obvious to a person of ordinary skill in the art at the time the invention was made in view of the prior art of record.
- As per independent claim 31, the limitations of "means coupled to the linking c. means for controlling the quality of the first and second sets of program source materials by selective use of an objective quality standard that includes metrics of the quality of the layers, and a subjective quality standard that is controlled by user feedback (lines 14-20)" are not anticipated by the prior art of record and would not have been obvious to a person of ordinary skill in the art at the time the invention was made in view of the prior art of record.
